DECODE UPSC with Mounika

Reel: The United Nations climate summit: what will India say?

YouTube Short · about 1:30 · English + తెలుగు · connected story · no short forms

How to record

- **Set your camera to 1080p, and record in one take** if you can. Send the original file.
- **Sound curious and global**, like telling a friend about a big world meeting that affects them.
- **The bold questions are the bridges.** Ask each one, pause for half a second, then answer.
- **Telugu lines (🗣️):** slower and warmer.
- **At the end, stay still and smile for 2 seconds.**

Script

How it flows: what it is → why India cares → what India will demand → what India itself promised → trap → Mains debate.

📷 **FULL FACE:** ***intriguing, curious.***

What if a meeting in Türkiye decides how hot your summers will be?

🗣️ **ఇదే నిజమే.**

From November 9th, the world meets in Antalya, *so what will India say there?* Let's decode.

🎙️ ***clear, explaining.***

First, what is it? It is COP 31, the **31st Conference of the Parties** to the **United Nations Framework Convention on Climate Change**, signed in **1992**, *and here is a twist:* **Türkiye hosts it, but Australia runs the negotiations.**

🎙️ ***serious, caring.***

But why should India care? Because, a new United Nations-backed report says, **Himalayan glaciers could lose a third of their ice even at 1.5 degrees** of warming.

🗣️ **మన నదులు అన్నీ ఈ glaciers మీద ఆధారపడ్డాయి.**

🎙️ ***firm, confident.***

So what will India demand? On November 3rd, the Environment Minister said climate finance must be **public and affordable, not new debt**, and every country's targets must stay **nationally determined**, not imposed from the top.

🎙️ ***slower on the numbers.***

And what has India itself promised? By **2035**, a **47%** cut in emissions intensity from **2005** levels, and about **60%** of power capacity from non-fossil sources. **Prelims trap:** that is an **intensity target, not a cap on total emissions**, and our net zero year is **2070**.

📷 **FULL FACE:** ***thoughtful, inviting.***

Mains debate: should those who polluted first pay first?

🗣️ **మీ అభిప్రాయం comments లో రాయండి**, and follow for one exam trap every day!

(Stay still and smile for 2 seconds.)

Pronunciation: Antalya [An-TAAL-ya] · Türkiye [TUR-kee-yay] · Cryosphere [KRY-oh-sfeer]

Title (pick one): 1. Climate Summit in Türkiye: What Will India Say? #UPSC #Shorts 2. COP31 Trap: Host or Negotiator? #UPSC #Shorts 3. India’s 2035 Climate Promise Explained #UPSC #Shorts

Description: > The 31st Conference of the Parties (COP31) to the United Nations Framework Convention on Climate Change runs 9–20 November 2026 in Antalya: Türkiye hosts, Australia runs the negotiations. Why India cares (Himalayan glaciers could lose a third of their ice even at 1.5 °C, State of the Cryosphere 2026), what India will demand (public, affordable climate finance; nationally determined targets) and what India has promised (47% cut in emissions intensity by 2035 vs 2005; about 60% non-fossil power capacity; net zero 2070). Explained in English and Telugu. > Full weekly class every Sunday, 6 PM. > #UPSC #UPSC2027 #CurrentAffairs #COP31 #ClimateChange #Environment #InternationalRelations #APPSC #TGPSC #Telugu #Shorts

Pinned comment: > 🧠 Quick test: Consider these statements: > 1. COP31 is being hosted by Türkiye, while Australia leads the negotiations. > 2. India’s 2035 target is a cap on its total greenhouse gas emissions. > 3. India will host COP33 in 2028. > How many are correct? (a) Only one (b) Only two (c) All three (d) None > Comment your answer! ✅ Answer: (a) Only one: statement 1. India’s target is an intensity target, and India withdrew its bid to host COP33 in April 2026.
